Declaration of compliance

Dottir nordic design (Dottir K/S Cvr. 36709820) designs and distributes a range of ceramic products, which is intended to be used for food. The products are produced at factories located in China and Portugal.

The intend of the products is to either serve food on or in, or to eat or drink from. The products can be used in a microwave oven. It is not recommended to use the products in an oven, as the products glaze could crack after prolonged use at high temperatures. The products are dishwasher safe.

Each of the products has been tested a FORCE technology, and have been found to comply with the requirements for the release of Lead and Cadmium Council Directive 84/500/EEC as amended by Commission Directive 2005/31/EC. Besides this, the products have also been tested at our factories for compliance with the mentioned regulations.

The full list of products and the test report from FORCE technology can be found on our website: dottirnordicdesign.com/declaration-of-compliance or can be requested through Customer service.
